Experience

- **June 2023 – August 2023 | 128 Technologies**
Worked as a UI/UX Designer, creating user-friendly and visually appealing designs to enhance the overall user experience.
- **February 2024 – March 2024 | CognitoRise Info Technology**
Completed an internship as a UI/UX Designer, designing interactive prototypes and improving design workflows for better usability.
- **July 2024 – September 2024 | Homstels**
Interned as a WordPress Developer at a startup, developing and optimizing websites for better performance and user engagement.

Recent Projects

- **IELTS Website** – Developed a responsive IELTS preparation website using React.js for the frontend and Node.js with Express for the backend.
- **Sweden Relocators Platform** – Developed a full-scale relocation platform including website, admin portal, client portal, and company dashboard using Next.js, with Firebase as the backend database; contributed to the project over a 1-year development cycle.
- **Web Design Agency Website** – Developed a professional website for a web design agency showcasing services and portfolio.
- **Automated Document Verifier** – Developed a document verification system in Python, which accepts user and document videos and verifies identity based on mean facial data.
- **PayPalm (Biometric Payment System)** – Designed and developed a biometric-based payment solution enabling palm-vein scanning for secure transactions, along with a mobile banking app built using React Native (Expo).
- **Blood Donation App** – Designed and prototyped a mobile app using Figma to streamline blood donation processes, enabling users to register as donors or request blood.
