📍 Islamabad, Pakistan

SUMMARY

I'm a final-year Software Engineering student with over 3 years of experience in UI/UX design and more than 2.5 years in front-end development. I specialize in skills like React, Next.js, TypeScript, and Tailwind CSS, with a strong foundation formed through projects ranging from enterprise portals to AI-driven applications. My focus is on creating clean, fast, and accessible interfaces, capitalizing on my design background in Figma

EXPERIENCE

Front-End Developer

Freelance

📅 05/2025 📍 Remote

- Working remotely with multiple clients, taking projects and providing high-quality to my clients.

WordPress Developer

WordPress Development Internship

📅 07/2024 - 09/2024 📍 Onsite

- Built and customised WordPress sites using Elementor, custom themes, and reusable blocks
- Optimised page speed, on-page SEO, and responsive layouts for client websites

UI / UX Designer

CognoRise Technology

📅 02/2024 - 03/2024 📍 Remote

- Designed user flows, wireframes, and high-fidelity mockups in Figma for web and mobile products
- Iterated on designs based on team feedback, focusing on clarity and a consistent visual language

UI / UX Designer

128 Technologies

📅 07/2023 - 09/2023 📍 Hybrid

Internship in UI/UX design

- Produced wireframes and high-fidelity Figma mockups for web screens
- Worked closely with developers to ensure clean handoff from design to code

EDUCATION

Bachelor of Science in Software Engineering

Air University

📅 09/2022 - Present 📍 Islamabad, Pakistan

SKILLS

GitHub	React	Next.js	TypeScript	Tailwind	HTML	CSS	Figma
Material UI	Stripe	Node.js	Python	WordPress	SEO	Wireframes	
Mockups	React Native	IoT	UX Research	Web Scraping	Redux		
JavaScript	Wireframing	REST	MongoDB	Git	Vercel		
Visual Studio Code	huggingface	Flutter					

KEY ACHIEVEMENTS

Multiple Client Engagement Management

Successfully managed multiple client projects while ensuring high quality of output and timely delivery

PROJECTS

PayPalm

Developed a banking solution biometric technology

- Full mobile banking app with palm-vein scanning hardware allowing users to sign in and pay by scanning the vein pattern with card and PIN.

Sweden Relocators Portal

Comprehensive client portal designed for efficient immigration and relocation services

- Enterprise client + company portal for immigration and relocation services.

IELTS Counsel

Interactive IELTS preparation and assessment tool leveraging AI technology

- Full IELTS preparation platform covering Listening, Reading, Writing, and Speaking module.

Sweden Relocators Website

Marketing website for Sweden Relocators with a focus on user engagement and information accessibility

- Fully responsive and SEO-friendly design

Nordic Relocators Website (Denmark)

Targeted marketing website for the Nordic market focused on local services

- Maintains same design system as the Sweden site with full English / Danish support

TRAINING / COURSES

Level 1 BlockChain Awareness

128 Technologies

Six Sigma and the Organization

Coursera (KENNESAW STATE UNIVERSITY)

LANGUAGES

English	Proficient	
Urdu	Native	

Code Smell Detection

Web-based tool focused on static analysis of code quality

- Web tool that scans uploaded source code and find code smells including bloaters, couplers etc.

Blood Pulse Connect

UX research and design with prototyping aimed at enhancing blood donation processes

- High-fidelity Figma design for a blood donation app connecting donors and recipients

FB Marketplace Scraper

Tool for extracting data from Facebook Marketplace for analysis

- Developed a web scraper that pulls live product listings from Facebook Marketplace.
